Sample Turn Around

Energy Northwest Environmental Services Analytical Laboratory does not guarantee a set turn-around time to anyone except those who are paying additional rush fees. Samples to be analyzed for more than one contaminant will have the turn-around time associated with the longest analysis. It is not our policy to write partial reports. Standard completion times for other samples vary according to the number and nature of the tests required, and normally ranges from 10 to 14 working days. Priority turn-around times can be provided for most tests. Contact the laboratory for priority availability and pricing.

ANALYSES AND PRICE LIST, JANUARY 2013 TO DECEMBER 2013

Analytical Methods

ASTM: American Society for Testing and Materials *ASTM Standards*

EPA: Environmental Protection Agency *Methods and Guidance for Analysis of Water*

NWTPH: Washington State Department of Ecology methods

SALI: Energy Northwest *Supplemental Analytical Laboratory Instructions*

SM: *Standard Methods for the Examination of Water and Wastewater*

SW 846: Environmental Protection Agency *Test Methods for Evaluating Solid Waste Physical/Chemical Methods*

The methods listed are those most commonly used, selected to conform to regulatory requirements and accepted scientific practices. An individual sample may contain materials interfering with a specific method listed above and preventing determination of the tested parameter. In these cases, with approval of our customers our analysts can usually provide accurate results using an alternate method. Any alternate methods used will be listed on the sample report.

Subcontracted Analyses

The Energy Northwest Environmental Services Analytical Laboratory offers sample tracking, shipping, results reporting and invoicing for several analyses that are not cost-effective to perform in our facility. Only cooperating laboratories with appropriate accreditations are used, and they have been selected based on both price and quality of service. In periods of unusually high sample loads or instrumentation difficulties, our cooperating laboratories also may perform some analyses we usually provide.

Additional Capabilities

Along with the listed chemical tests, we offer other specialized services. Environmental sampling, identification of unknowns, analysis of non-standard chemicals or matrices, thermal testing, individual agricultural chemicals and analytical method development are some of the available services. Call to request a quote for any of your requirements not included in this price list.
