Subject: **PACKWOOD LAKE HYDROELECTRIC PROJECT
FERC DOCKET NO. P-2244-048
PIPELINE, SURGE TANK AND PENSTOCK MONITORING**

Reference: Letter dated July 28, 2020; Federal Energy Regulatory Commission to Energy Northwest; Pipeline, Surge Tank and Penstock Monitoring Plan – U.S. Department of Agriculture – Forest Service Condition No. 15

This filing is in response to the July 28, 2020 letter, referenced above, whereby the Commission issued approval for Energy Northwest (EN) to use their existing Dam Safety Surveillance and Monitoring Plan (DSSMP) to satisfy the requirement of United States Department of Agriculture – Forest Service (USFS) 4(e) Condition No. 15.

EN hereby submits Revision 7 of the DSSMP in response to the referenced letter. EN engaged the USFS in the review cycle and the USFS responded with no additional changes or comments. Proof of consultation is included in this filing.

EN revised the DSSMP to include the details in the referenced letter. The updated sections of the DSSMP include the Purpose, Plan Review, Reporting, and References.

EN filed Revision 7 of the DSSMP with the Commission's Portland Regional Office and provided a copy to the USFS on August 12, 2020.

EN is not requiring a response of the Commission on this filing.

EXTERNAL: Think Before You Click!

Good morning, Audrey,
I have reviewed the DSSMP and I don't have any comments, but I do have a question.

The July 28, 2020 letter from FERC in paragraph 2 of the background section indicates:

“The Forest Service Regional Dam Safety Program Engineer acknowledged that the DSSMP is an adequate plan and meets the intent of condition 15. You filed the existing DSSMP - Revision 6 to satisfy the requirement of condition 15 to file a Pipeline, Surge Tank and Penstock Monitoring Plan with the Commission for approval. Your filing includes record of consultation with the Forest Service.”

I cannot find this correspondence in Ruth’s files. Could you please send me this letter/documentation.
Thanks,

Kate Day

Action: Review and Comments Requested.

Kate,

In accordance with the attached letters as they relate to Condition No. 15 – Pipeline, Surge Tank and Penstock Monitoring, I am request USFS to review the draft of Packwood Lake Hydroelectric Project’s Dam Safety Surveillance and Monitoring Plan Revision 7. The sections that are being revised are indicated with revision bars in the margins.

There are no changes to the Appendices. Attached are courtesy copies.
