Governor reappoints David Remington to Energy Northwest Executive Board

RICHLAND, Wash. – Governor Christine Gregoire has reappointed David G. Remington to Energy Northwest’s 11-member Executive Board. Three of the members are appointed by the governor of Washington, three are drawn from industry ranks and five are elected from the 22-member Energy Northwest Board of Directors.

Remington first joined the public power agency’s Executive Board in December 2004 when he was appointed to a four-year term by then Governor Gary Locke. His new term will run through June 30, 2012. He served as Executive Board Secretary during his first term.

He is retired from Spokane-based Itron, Inc., where he last served as senior vice president and CFO. In that capacity he was responsible for all accounting, tax, finance, and mergers and acquisitions transactions for the public company, which provides hardware and software solutions used to optimize the delivery and use of electricity, natural gas and water.

Remington has more than 35 years experience in finance, treasury, and investment banking services, including eight years as managing director at Dean Witter Reynolds where he specialized in highly-structured private debt and equity transactions, including project financings.

Remington served as an officer in the Army Reserve, and holds an MBA from the Harvard Business School and a BS in electrical engineering from the University of California - Berkeley.

Energy Northwest is a not-for-profit public power, state Joint Operating Agency headquartered in Richland, Washington. Chartered in 1957, the consortium has 22 public power members; 19 public utility districts and three municipalities. The agency’s nuclear, hydroelectric, wind, and solar projects collectively deliver nearly 1,400 megawatts of reliable, affordable, environmentally responsible electricity to the Northwest power grid. Energy Northwest continually explores and develops new generation opportunities while offering a wide range of energy and business services.
